

Point sur le Groupe de Travail GORC International Model de la RDA

Francoise Genova

Réunion RDA-UNISTRA

8 février 2023

Un GORC, qu'est-ce que c'est?

- GORC = Global Open Research Commons
- La définition donnée dans la charte du Groupe d'Intérêt Global Open Research Commons de la RDA:

“The coordination of data infrastructure on various levels (country, continent, discipline, sector) is on the increase. So called “Open Science Commons” or “Data commons” provide a shared virtual space or platform that provides a marketplace for data and services. Examples include the European Open Science Cloud, the Australian Research Data Commons, the African Open Science Platform, open government portals and initiatives outside traditional research contexts. Coordinating across these initiatives to enable a network of interoperable data commons is the goal.”

Defining and classifying Global Open Research Commons to promote alignment and collaboration

Le Groupe de Travail GORC Model

“This International Model WG will collect and curate a set of attributes that will allow Commons developers to compare features across science clouds and commons.”

<https://www.rd-alliance.org/groups/gorc-international-model-wg>

- Une réunion par mois
- Audition de nombreux GORC
 - Le premier auditionné a été l'IVOA – extension par rapport à la définition initiale: définition et maintenance des standards disciplinaires (astronomie) au niveau international, registre, documentation
 - EOSC, exemples nationaux, exemples nationaux et disciplinaires, etc

Travail en cours

- Définition des “Attributes” et de leurs “Features”
- Task Groups
 - TG1: Governance, Rules of Participation, Sustainability
 - TG2: Engagement, Human Capacity
 - TG3: ICT Infrastructure, Research Objects
 - TG4: Interoperability, Standards
 - TG5: Services and Tools
- Les TG examinent une liste préliminaire et commentent ses éléments
- Version 1 en cours de préparation pour discussion à la plénière
 - Session du Groupe
 - Réunion spécifique le vendredi
